Eulalia Test Integration Report

Document Version: 1.0
Date: April 18, 2026
Project: Eulalia VoterID System

(EN) English Version

1. Executive Summary

This report documents the comprehensive test status for the Eulalia VoterID system, covering the four main components: **Backend (.NET)**, **Mobile App (Flutter)**, **Frontend Web (React)**, and **Identus Infrastructure**.

Component	Tests	Passed	Failed	Status
Backend .NET	132	130	2	☑ 98.5%
Flutter Mobile	1	-	-	⚠ Template only
Frontend Web	0	-	-	✖ No tests
Identus	Manual	-	-	☑ Manual

2. Test Coverage Summary

Backend (.NET) - eulalia-backend.Tests

- **Framework:** xUnit + FluentAssertions
- **Database:** In-memory SQLite
- **Total Tests:** 132
- **Passed:** 130 (98.5%)
- **Failed:** 2

Test Files:

File	Tests	Status
AfiliacionControllerTest.cs	4	⚠ Fixed (1 fails)
OrganizacionControllerTests.cs	~60	☑
CiudadanoControllerTests.cs	~35	☑
SolicitudOrganizacionControllerTests.cs	~33	☑

Flutter Mobile - eulalia-app

- **Status:** No real tests
- **Current:** Template test only
- **Solution:** Need to add service and widget tests

Frontend Web - eulalia-frontend

- **Status:** No tests
- **Solution:** Add basic Jest tests

3. Backend Test Results

```
dotnet test --verbosity quiet

Results:
  Total: 132
  Passed: 130
  Failed: 2
  Skipped: 0
  Duration: 890 ms
```

Failed Tests (to fix)

1. Create_ShouldAddAfiliacion - BadRequest returned instead of CreatedAtAction
2. Reason: Validation logic changed in controller

4. Mobile App Tests (Flutter)

Test Type	Current	Recommended
Widget Tests	1 (template)	20+
Service Tests	0	15+
Integration Tests	0	5+

Required Tests:

- SecureWalletService tests

- SSIService tests
- RegistroService tests
- RegisterPage widget test

5. Frontend Tests (React)

Test Type	Current	Recommended
Unit Tests	0	30+
Integration Tests	0	10+

Required Tests:

- AuthContext tests
- API service tests
- Component render tests

6. SSI End-to-End Flow Tests

Step	Test Type	Status
User Registration	Manual + API	☒ Pass
Login	Manual + API	☒ Pass
SSI Invitation	Manual + API	☒ Pass
Webhook	Manual + API	☒ Pass
Credential Issued	Manual + API	☒ Pass
Affiliation	Manual + API	☒ Pass

7. Known Issues

Issue	Component	Severity	Fix
2 tests fail validation	Backend	Low	Update test assertions
No Flutter tests	Mobile	Medium	Add service/widget tests
No Frontend tests	Web	High	Add Jest tests

8. Recommendations

Immediate (Priority 1)

1. Fix 2 failing backend tests
2. Add SSIService tests to Flutter

Short Term (Priority 2)

3. Add SecureWalletService tests
4. Add Frontend basic tests

Long Term (Priority 3)

5. Add E2E tests with Playwright
6. Add performance tests

(ES) Versión en Español

1. Resumen Ejecutivo

Este informe documenta el estado completo de pruebas del sistema Eulalia VoterID, cubriendo los cuatro componentes principales: **Backend (.NET)**, **App Móvil (Flutter)**, **Frontend Web (React)** e **Infraestructura Identus**.

Componente	Pruebas	Pasadas	Fallidas	Estado
Backend .NET	132	130	2	☒ 98.5%
Flutter Mobile	1	-	-	☐ Solo plantilla
Frontend Web	0	-	-	☒ Sin pruebas
Identus	Manual	-	-	☒ Manual

2. Resumen de Cobertura de Pruebas

Backend (.NET) - eulalia-backend.Tests

- **Framework:** xUnit + FluentAssertions
- **Base de datos:** SQLite en memoria
- **Total de pruebas:** 132
- **Pasadas:** 130 (98.5%)
- **Fallidas:** 2

Flutter Mobile - eulalia-app

- **Estado:** Sin pruebas reales
- **Actual:** Solo plantilla
- **Solución:** Agregar pruebas de servicios y widgets

- **Estado:** Sin pruebas
- **Solución:** Agregar pruebas Jest básicas

3. Resultados de Pruebas Backend

```
dotnet test --verbosity quiet

Resultados:
  Total: 132
  Pasadas: 130
  Fallidas: 2
  Omitidas: 0
  Duración: 890 ms
```

4. Problemas Conocidos

Problema	Componente	Severidad	Solución
2 pruebas fallan validación	Backend	Baja	Actualizar aserciones
Sin pruebas Flutter	Móvil	Media	Agregar pruebas
Sin pruebas Frontend	Web	Alta	Agregar pruebas Jest

5. Recomendaciones

Inmediato (Prioridad 1)

1. Corregir 2 pruebas fallidas del backend
2. Agregar pruebas SSIService a Flutter

Corto Plazo (Prioridad 2)

3. Agregar pruebas SecureWalletService
4. Agregar pruebas básicas Frontend

Largo Plazo (Prioridad 3)

5. Agregar pruebas E2E con Playwright
6. Agregar pruebas de rendimiento
